

Introduction to Bird Survey Techniques

Introduction

This classroom-based course covers when a bird survey may be required and provides an introduction to key skills, experience and knowledge necessary for undertaking a range of professional bird surveys in the UK.

Course content

- When might a bird survey be required?
- Birds and the law - legal status and licences
- Introduction to bird species and families in the UK, and identification features
- Survey equipment and aids
- Bird survey techniques and methods
- Interpretation and reporting of findings
- Health and safety

A course certificate will be issued following completion of a test.

Where?

The course is held at our main office, just outside of Exeter.
