## Things to bring with you

### **Format**

Whilst in the classroom, we normally have a morning and afternoon comfort break of around 15 minutes, and a lunch break of one hour, unless the group consensus is to shorten lunch and finish sooner.

### **THINGS TO BRING WITH YOU: -**

- Clipboard, pen, pencil and paper
- Lunch/snacks/water bottle. Tea, coffee and water will be provided.
- Outdoor clothing and footwear, including wellington boots for field courses. We suggest layering, as we cannot forecast the weather, and it may get cold, particularly during evening surveys, e.g., great crested newts and bat hibernation. Wellingtons recommended and clothes will get muddy for bat hibernation.
- Hard hat (essential for bat hibernation course,
- Head torch and hand torch (essential for bat and great crested newt surveys).
- Face mask and thin gloves (essential) for any animal handling (for COVID risk) and for bat hibernation.
- Leather welding gauntlets for adder handling.
- Binoculars may be useful, but not essential.
- Hi-vis vest (if you have one).
- Rucksack to keep the above in when on site.
- Your logbook if you want it signing.
- A good attitude and a smile!
