

# Advanced Bat Survey Techniques Course Timings

Throughout the three days, you will explore advanced bat survey methods used in professional consultancy and research contexts. The course includes both theoretical sessions and intensive night-time fieldwork. Timings are approximate and subject to change depending on course progress and weather conditions.

| Date  | Start time | Finish time     | Notes                                                                                                                                                                                                                                         |
|-------|------------|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
